

Affordable uniprocessor server for mid-sized businesses or distributed environments

## IBM @server® xSeries 206m

---

### Highlights

---

- ***Manage your business with a server that offers many configurations and room to grow***
- ***New technologies such as dual-core processors help protect your investment***
- ***New, high-availability features help keep systems running***

The IBM @server® xSeries® 206m brings new features to entry-level servers that help lower overall IT costs and better accommodate growth.

#### **Available to run your business**

The x206m is highly expandable and provides unprecedented system availability. On select models, upgrade hard disk drives (HDDs) from low-cost, fixed Serial ATA (SATA) to Serial Attached SCSI (SAS), a new HDD technology

that adds more performance and features. And even if a HDD or power supply fails, the x206m can stay up and running with features such as hot-swap SATA and SAS HDDs and redundant power supplies.

#### **Protect your investment and your data**

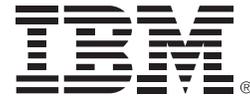

New features such as DDR II memory and PCI-Express help extend the life of your system. Dual-core processor models provide higher performance for systems running multiple applications. Protect your data with IBM ServeRAID™-8e, which provides RAID-0 or -1 delivering more features than standard server operating system-based RAID. For more robust RAID-5 or RAID-6 data protection, IBM offers optional upgrades that are part of the IBM ServerProven® program.

## xSeries 206m at a glance

<b>Form factor/height</b>	Tower/5U
<b>Processor</b> (L2 cache/CPU GHz/front-side bus MHz max)	Intel® Pentium® D (dual-core) (2 x 1MB/up to 3.0/800) or Intel Pentium 4 (1MB or 2MB/up to 3.4/800), both support Intel Extended Memory 64 Technology
<b>Number of processors</b> (std/max)	1/1
<b>Memory</b> (max) <sup>1</sup>	Up to 8GB PC2-4200 DDR II
<b>Expansion slots</b>	2 PCI, 2 PCI-X (model dependent) and 2 PCI-Express
<b>Disk bays</b> total/hot-swap	4 fixed simple swap or hot-swap Serial ATA hard disk drives or 4 hot-swap Serial Attached SCSI hard disk drives
<b>Maximum internal storage</b> <sup>1,2</sup>	Up to 1.2TB hot-swap Serial Attached SCSI (SAS) HDDs, or up to 1TB hot-swap, simple-swap or fixed Serial ATA HDDs
<b>Network interface</b>	Integrated 10/100/1000 Ethernet
<b>Power supply</b> (std/max)	400W 1/1 or 430W hot-swap redundant 2/2 (model dependent)
<b>Hot-swap components</b>	Hard disk drives, power supplies (model dependent)
<b>RAID support</b>	Integrated IBM ServeRAID™ -8e (RAID-0, RAID-1), optional upgrade to RAID-5 and RAID-6
<b>Systems management</b>	IPMI 1.5-compliant mini-BMC, IBM Director, Alert Standard Format 2.0, ServerGuide™, optional Remote Supervisor Adapter II and optional Remote Deployment Manager
<b>Operating systems supported</b>	Microsoft® Windows® Server™ 2003 Standard Edition/Enterprise Edition, Windows Small Business Server 2003, Red Hat® Enterprise Linux®, SUSE LINUX Enterprise Server, Novell NetWare 6.5, OS 4690
<b>Limited warranty</b> <sup>3</sup>	1-year or 3-year onsite limited warranty (model dependent)

<sup>1</sup> Maximum internal hard disk and memory capacities may require the replacement of any standard hard drives and/or memory and the population of all hard disk bays and memory slots with the largest currently supported drives available. When referring to variable speed CD-ROMs, CD-Rs, CD-RWs and DVDs, actual playback speed will vary and is often less than the maximum possible.

<sup>2</sup> When referring to storage capacity, GB = 1,000,000,000 bytes. Accessible capacity is less.
